2019 NDACE Conference Bridge Rehab with Local Forces

Nick West, PE
Grand Forks County Engineer

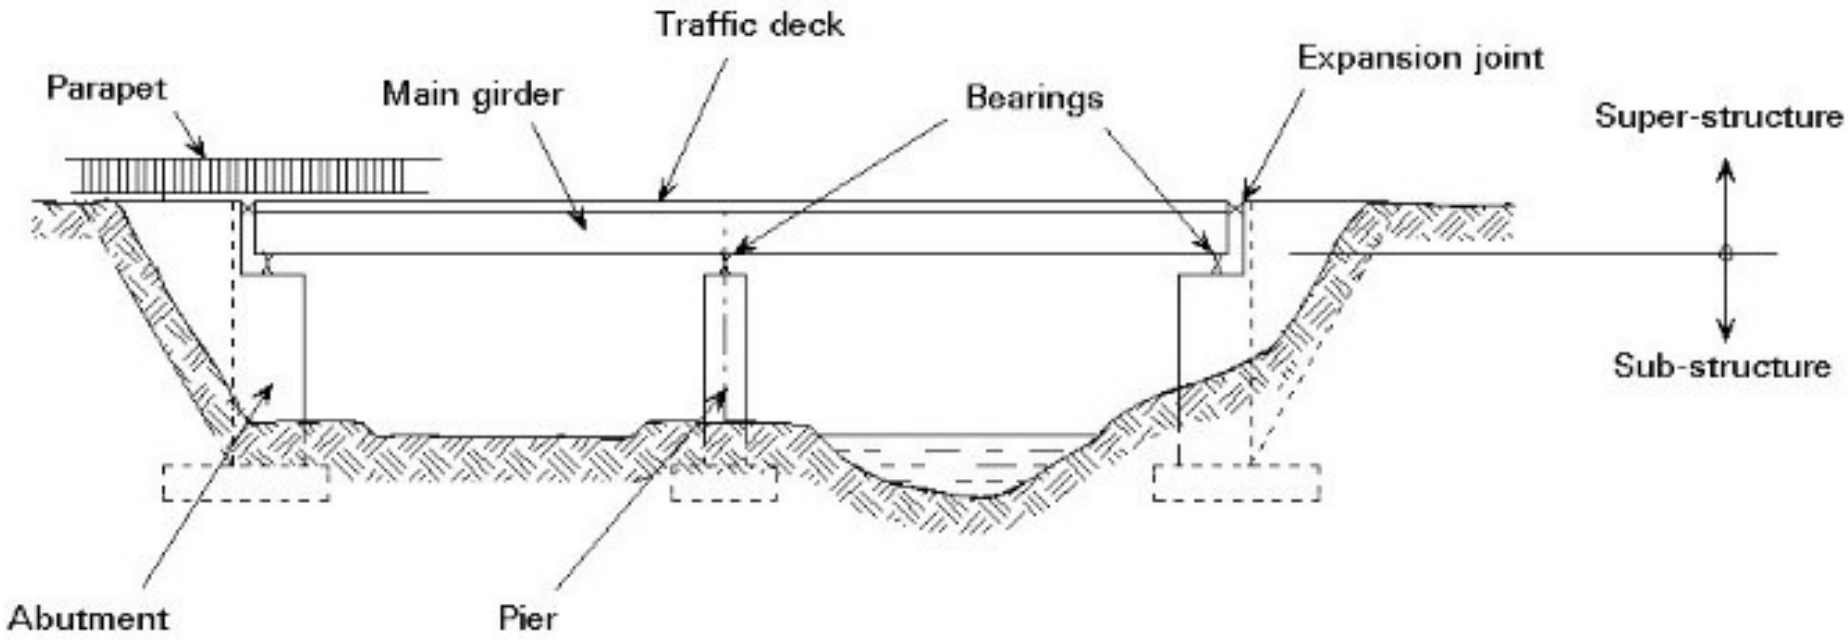
North Dakota Association of County Engineers

GRAND FORKS COUNTY
HEART OF THE RED RIVER VALLEY

Grand Forks County Inventory

- 2015 Inspection
- 279 Major Structures
- 41 Structural Deficient
- 12 Functionally Obsolete
- 70 Have a Ton Limit
  - End of 2019 down to about 50

Bridge Components 101



So Your Bridge Needs Work

- Do we need the bridge?
  - Remove Immediately
  - Deteriorate then Remove
- Deficiency is Okay – Goes to Single Family
- Rehabilitate
  - What part is the problem – Typically Beams & Deck
  - Salvaged Material
- Replace – not worth fixing

Project Selection

- Consider Tier System
- Snow Plow Routes
  - Equipment Weights ≈ 22 Tons
  - Bridges Less Than 22 Ton Limit
- Traffic Patterns – Thru Routes
- Spread Throughout County

Can’t Afford This Everywhere

GRAND FORKS COUNTY
HEART OF THE RED RIVER VALLEY

Major Bridges with Ton Limit Inspection Form

	Date: 9-21-17
Bridge Number: 142-27.0	Location (Township/Section): Walle 14-23
Sufficiency Rating: 69.9	Posted Ton Limit: 32
Is bridge used/needed (yes/no/maybe) Explain:	
Usage of Roadway: (high / medium / low)	Priority Level of a Project (high / medium / low)
If no above, what should be done with exst bridge:	
If yes above: rehabilitate or replace (is substructure worth saving) See SIA, East abutment leaning	

Rehabilitate: specifically what is need: how many and size - stringers/beams, deck, material type, can it be widened, guardrail, county or contractor forces do work

Temp fix
- Consider welding supports on beams to stop abutment leaning... by some Time

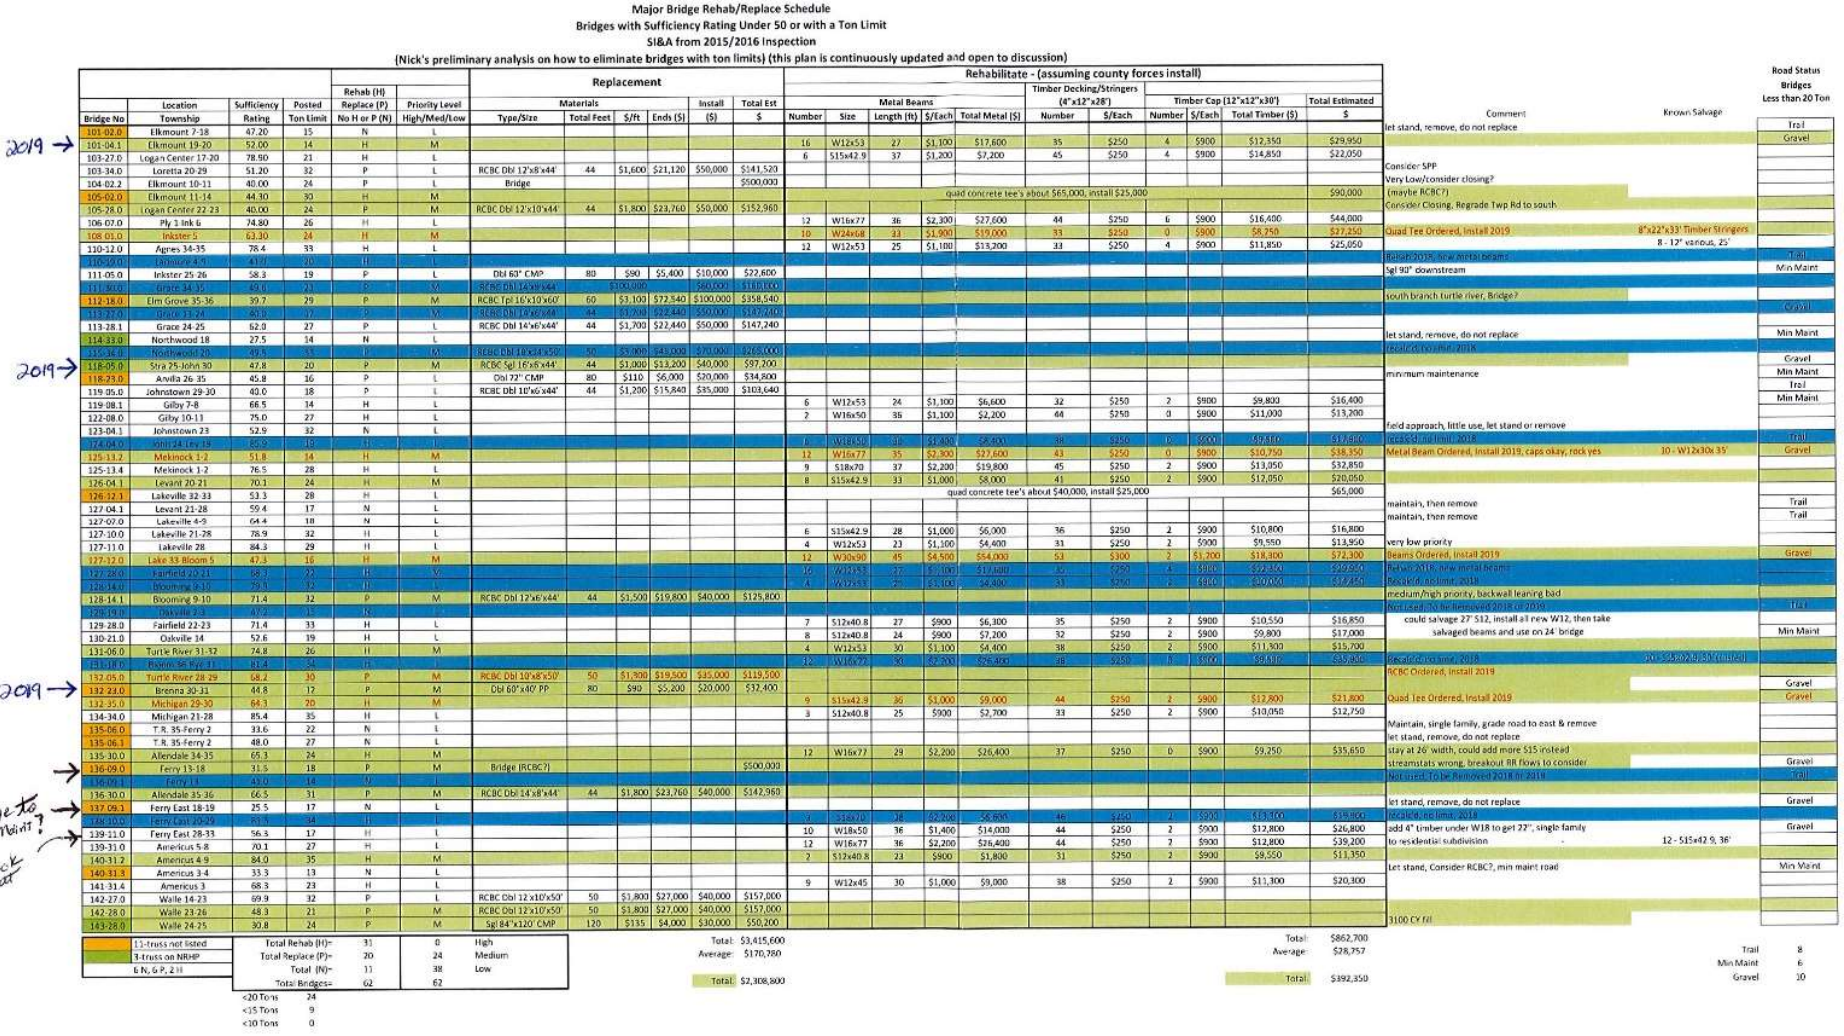
Estimated Rehab Cost:

Replace: estimated replacement material type, size, length skew, erosion control, grading, elevation changes, surrounding structures, historic:

- Exst opening 25' x 8'
- Recommend Dbl 12'x8' RCBC, total length 64' w/Ends
- Raise Rodd couple of feet to increase sight distance
- Not Historic - contractor
- NO skew
- Lots of Rip rap to salvage & Reuse
- No immediate upstream structures
- Slightly rusted 12" W beams salvagable, 12 Each
- move new East slightly to align channel

Estimated Replacement Cost:

Inventory & Plan



Major Bridge Rehab/Replace Schedule
Bridges with Sufficiency Rating Under 50 or with a Ton Limit
SI&A from 2015/2016 Inspection
(Nick's preliminary analysis on how to eliminate bridges with ton limits) (this plan is continuously updated and open to discussion)

						Replacement						Rehabilitate - (assuming county forces install)
