SMART PAVING: USING TECHNOLOGY TO IMPROVE QUALITY (TLN WEB 118B)

DATE: November 07, 2021 8:00 AM - 9:00 AM (CST)
 PRESENTED BY: NDDOT, SDDOT, MDOT, WYDOT, and the Mountain-Plains Consortium Universities

OBJECTIVE: Paving is a complex task. It is often the most expensive and time-consuming part of a project. This webinar will explore the use of smart paving technology to improve quality and reduce costs.

- Understand the benefits of smart paving
 - Reduce the risk of quality control
 - Increase the speed of construction
 - Reduce the cost of construction
 - Increase the safety of construction
- Understand the challenges of smart paving
 - Limited availability of smart paving technology
 - Limited availability of smart paving equipment
 - Limited availability of smart paving personnel
 - Limited availability of smart paving materials
- Understand the solutions to smart paving
 - Use of smart paving technology
 - Use of smart paving equipment
 - Use of smart paving personnel
 - Use of smart paving materials
- Understand the future of smart paving
 - Continued development of smart paving technology
 - Continued development of smart paving equipment
 - Continued development of smart paving personnel
 - Continued development of smart paving materials

PRESENTER: NDDOT, SDDOT, MDOT, WYDOT, and the Mountain-Plains Consortium Universities

EXECUTIVE VICE PRESIDENT, AGC OF NORTH DAKOTA

The AGC of North Dakota

the unified voice

A photograph of two construction professionals, a man and a woman, wearing hard hats and high-visibility vests. They are standing in a large, open industrial or construction space with concrete pillars. The woman is holding a set of blueprints, and the man is holding a tablet. A large, semi-transparent blue graphic element is on the left side of the image. The text 'Small Chapter of the Year' and 'AGC of North Dakota' is overlaid in white on the lower half of the image.
