OVERVIEW

The Annual North Dakota Elevator Marketing Report for 2023–24 was prepared by the Upper Great Plains Transportation Institute. The authors gratefully acknowledge the assistance of the North Dakota Soybean Council, the North Dakota Corn Utilization Council, the North Dakota Wheat Commission, and the North Dakota Department of Agriculture in compiling this report.

The objective of this report is to provide a benchmark for elevator managers in assessing performance and supply a source for recognizing trends in the characteristics of North Dakota elevators. This report and the statistics mailed to individual elevators are presented as a source of information for elevator managers and those interested in the North Dakota grain industry. Continuation of the report as an annual project will be considered based on public response.

SOURCE OF DATA

The distribution and shipment data in this report were developed from the North Dakota Department of Agriculture reports that require elevators to report monthly movements of grains and oilseeds by truck and rail. The elevator storage capacities reported to the North Dakota Department of Agriculture were used to calculate the turnover ratios. Elevator size is estimated based on public data sources.

SCOPE OF REPORT

Data are tabulated according to elevator type to provide general information on characteristics that describe commodity flows or provide a benchmark for elevators.

• Turnover: Equal to the ratio of volume of grain handled to the storage capacity available.

• Destination:

2015-16 Crop Years and Earlier	2016-17 Crop Years and Later
Minneapolis/St. Paul	Minneapolis/SE MN & Chicago
Duluth-Superior	Duluth-Superior (unchanged)
Pacific Northwest (ID, OR, WA)	Pacific Northwest (unchanged)
Other Minnesota/Wisconsin	Other Upper Midwest
Midland & Gulf States (AR, AZ, CA, CO, IA, KS,	Midland & SW States (new label, states
LA, MO, MT, NE, MN, MV, OK, SD, TX, and WY	unchanged)
North Dakota	North Dakota (unchanged)
Other	Other (unchanged)

Origin: Nine crop reporting districts.

Mode: Truck or rail.

• **Elevator Size:** Elevators are stratified into five groups based on the number of cars an elevator can load without railroad switching services (1) Single Car (1 to 24 cars), (2) Multiple Car (25 to 49 cars),

(3) Unit Train (50 to 99 cars), (4) No Rail, and (5) Shuttle Train (100 cars or more).

• **Time:** Crop year, from July 2023 to June 2024.

• Commodity: Hard red spring wheat, durum, barley, sunflowers, soybeans, canola, corn, dry edible beans,

and dry edible peas.

ORGANIZATION OF THE REPORT

Five groups of data will be presented in this report: (1) individual elevator performance (e.g. turnover) and distribution information (due to confidentiality agreements, each elevator receives individual data on only its own activities), (2) storage capacity, volume handled, and turnover ratios by elevator size and for each crop reporting district, (3) elevator distribution and modal choice for the state, (4) destination information for each of the state's nine crop reporting districts and each of the commodities, (5) modal selection for each of the crop reporting districts and for each commodity marketed. Elevator managers will be able to compare their performance to that of similar elevators (e.g., size and location).

DEFINITION OF ELEVATOR SUMMARY VARIABLES

Storage: Bushels of storage as reported by the elevator to the ND Department of Agriculture.

Turnover Ratio: Ratio of grain and oilseed shipments to available storage capacity.

Elevator Size: No Rail Elevator: Elevator with no rail service

Single Car Elevator: Elevator with track space for 1 to 24 cars

Multi Car Elevator: Elevator with track space for 25 to 49 cars

Unit Train Elevator: Elevator with track space for 50 to 99 cars

Shuttle Train Elevator: Elevator with track space for 100 cars or more

Information used in the reports was based on railroad and North Dakota Department of Agriculture data. Track space refers to the number of cars that can be loaded without railroad switching assistance.

Mode for Grain & Oilseed Shipments by Rail:

Single Car Shipments: Car orders purchased under rates for 1 to 24 cars
25 to 49 Car Shipments: Car orders purchased under rates for 25 to 49 cars
50 Car Shipments: Car orders purchased under rates for 50 or more cars
100 Car Shipments: Car orders purchased under rates for 100 or more cars

Information used in reports was based on the monthly grain and oilseed movement and storage reports that elevators submit to the North Dakota Department of Agriculture.

Destinations for Grain and Oilseed Shipments:

Destinations for grain and oilseed shipments, reported by the elevators in the monthly reports, are not final destinations for shipments. The destinations reported for rail shipments are the Waybill destinations. The destinations for truck shipments are reported as they are specified on the billing statement.

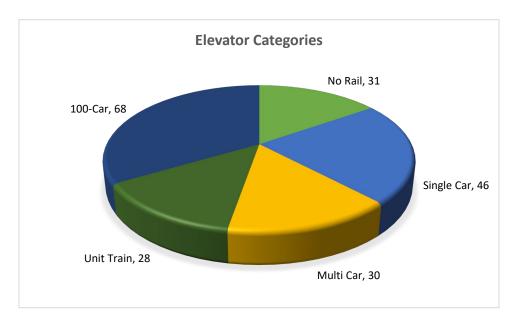

NORTH DAKOTA ELEVATORS, 2023-24

Storage: 373,312 thousand bu.

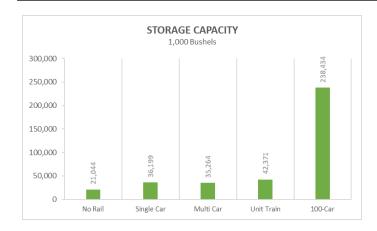

Grain Shipped to End User: 839,655 thousand bu.

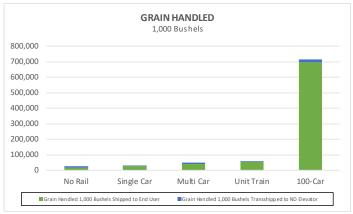

Grain Transshipped to ND Elevator: 44,440 thousand bu.

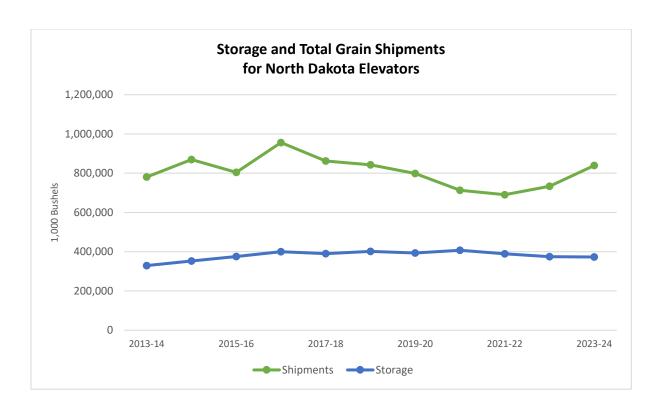

Average Turnover: 4.0

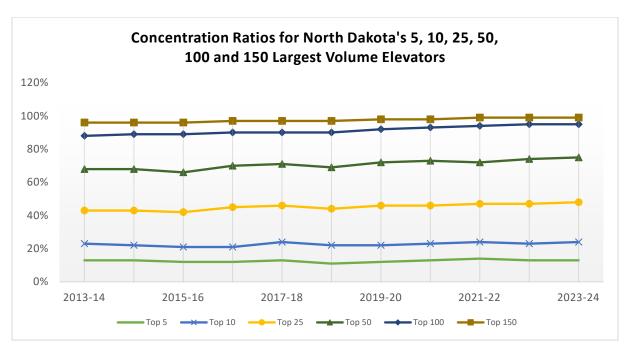

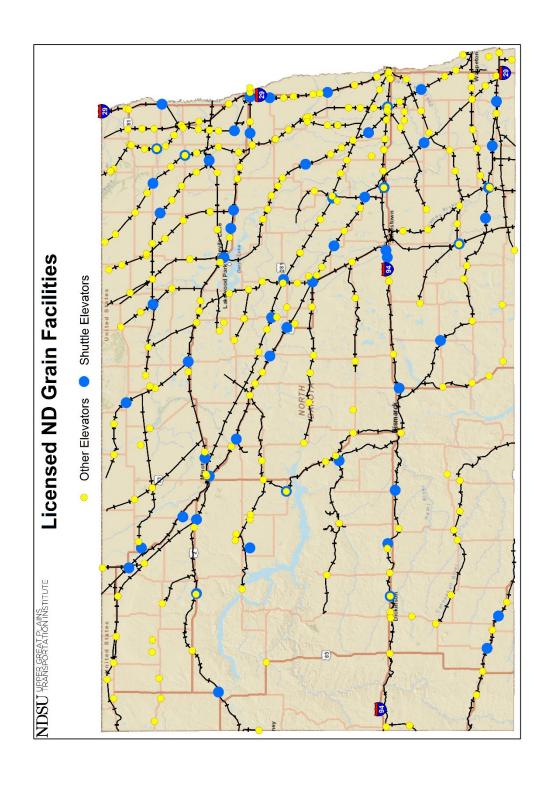

Note: Elevator categories are based on the number of rail cars an elevator can load without railroad switching assistance (pg. iv).
