## Safety Procedures for Moving Self-Propelled Machines on Public Roads

- **Empty combine grain tank**
  - The added weight could change the operational dynamics of system and cause safety concerns when crossing bridges.
- **Secure head in raised position**
- **Remove wide heads and transport on header wagon**
- **Lock brake pedals**
- **Move augers, and other components into the transport position**
- **Check SMV, hazard lights, and mirrors for function and visibility**

# Other Transport Hazards

- **Overhead clearances**
  - Low hanging power lines
  - Bridges
- **Hazardous materials**
  - Anhydrous ammonia
  - Chemicals
  - Manure
- **Sharp turns**
  - Ditches
  - Speed
  - Long equipment
