

COVID-19 Vaccines And Program

- **Advisory Committee on Immunization Practices (ACIP)**
- **Recommendations- Essential Workers**
 - **Phase 1b Public Transit, USPS, food/agricultural**
 - **Phase 1c Transportation and Logistics**
- **Evidence Table for COVID-19 Vaccines Allocation in Phases 1b and 1c of the Vaccination Program (cdc.gov)**

A NIOSH/CDC vaccine implementation workgroup has been working on developing strategies to support vaccine uptake among transportation workers.

We would welcome any comments about:

1. **perceptions and barriers** for uptake/vaccination
2. **implementation strategies**
3. groups/associations for **outreach**

Some Questions:

- **What do you know about vaccine uptake by workers in your company/industry (i.e., would a shot be commonly received)?**
- **What are vaccine requirements by businesses in your industry?**
- **What do businesses in your industry do to increase vaccine shot uptake? (onsite vaccinations, coverage for flu shot, etc.)**
- **What are the barriers to receiving the shot among workers in your industry?**
- **What is the best way to communicate with workers in your industry about the benefits of vaccines?**

Thank you!

Any comments?

Karl Sieber
